As an Approver, What’s My Role in Posting a Job Requisition?

This instruction guide supports the content found in the required course UF_PST098_OLT Careers at UF and is targeted to those serving as Approvers in Careers at UF and who possess the security roles of UF_N_JRQ Department Req App.

After a job requisition has been created and submitted for approval, those with the Approver role will need to review, and approve or decline the requisition. If approved, the requisition will move to the Core HR level for final approval. If declined, the requisition will return to the Originator for review and correction.

If the Approver has created the requisition, he or she will not also “approve” it. Approval will be completed at the Core HR level.
