As a Hiring Manager, How Do I Change Statuses in My Applicant Pool?

As the Hiring Manager, you will need to review incoming applications and help move them through the differing statuses until the job is filled or cancelled.

Navigation

First, log into myUFL in order to access Careers at UF. Use the following navigation path:

**NavBar → Main Menu → Human Resources → Recruiting → Job Requisitions**

Reviewing Applicants

1. After logging into Careers at UF, select **New Job**.

   ![New Job Step](image1)

2. Select **View** for the position you want to review available applications for.

   ![View Step](image2)
3. Click the View applications button.

4. Review the list of applicants in your pool.

Moving Applicants

There are multiple statuses available to which you can move an applicant or applicants. Hiring personnel can determine which of the statuses to use to help manage job applicants. Any status with an asterisk (*) next to it signifies that an automatic email is sent when an applicant is placed in this status. The statuses “Hiring Manager Review Unsuccessful” and “Interview Unsuccessful” will end the application life cycle and submit communication to the applicant. All applicants must eventually be moved to a Terminal Status to close the job requisition.
1. Select the applicant that you wish to change the status of.

2. Click the **Select a bulk action drop-down field.** Available Bulk Actions:

   a. Bulk assign – assigns applications to be viewed by other users
   b. Bulk communicate – communicates with the applicants to update them on the status of the position
   c. Bulk compile and send – selects documents and notes for a number of applicants and compiles to send as a PDF
   d. Bulk invite to apply – sends requisition information to a potential applicant and invites him/her to apply
   e. Bulk move – moves applicants to different application statuses
   f. Bulk move and send – sends applicant information to another user or reviewer and also moves the applicant to a different application status
   g. Bulk talk/reminder – sets a task/reminder regarding specific applicants
   h. Bulk apply – this feature is not available

3. Choose **Bulk move.**
4. Select the desired status.

5. Click the **Next** button.

6. Complete the status change page that appears, if needed.

For statuses that are not terminal, you can select to use a communication template to send email correspondence to the applicants. A best practice is to wait until the recruitment process is complete before sending any emails to applicants.

7. Update the job status, if appropriate.

Updating the job status will change the status of the job requisition that you can see on the job card and possibly on the Dashboard. This indicates where the requisition is its own life cycle. After the selected candidate has been cleared for offer and accepts the offer, the department should update that person’s status to “Offer” and this notifies Core HR that the hiring process is complete and the job requisition should be marked as “Filled.”

8. Click the **Move now** button, if changing the job status.

9. Confirm the job applicant’s status has now changed to the new status.
Changing the status of more than one Applicant

You may wish to move more than one applicant to a different status. You can do this by selecting the desired applicants and moving all together.

1. Select all the applicants desired.
2. Click **Select a bulk action drop-down field**.
3. Choose **Bulk move**.

![Bulk action drop-down menu](image)
4. Choose the desired status from the **Application status drop-down field**.

![Bulk move](image)

5. Click the **Next** button.
6. Complete the status change page as needed.
7. Update the job status, if needed.
8. Click the **Move now** button.
9. Confirm the status of the selected applicants has changed.

**Additional Help**
