

Enterprise Reporting: PowerPlay

Show Report Values as Percentages

You can show report values as a percentage of the row or column subtotals or of the report total. Examining a dimension as a percentage can provide new insights into your business data. For example, you have Products in the rows of your report and show the revenue values for each product as a percentage of all rows. You can see which products contributed the most to total product revenue.

Steps

- In the PowerPlay Web display, right-click the Measure heading, and then click a percentage data format.

Tip

- You can also click the Display Options button on the PowerPlay Web toolbar and then, in the Display Measures box, select a percentage data format.
