

PROCESSING A CASH EXPENSE REFUND

Cash Expense Refunds are received in the form of Refunds, Reimbursements, Rebates or Returned funds from a vendor. Cash expense refunds always relate to an expense paid for by UF and must be returned to the ChartField of origin.

Use the original ChartField string information from the expense as the ChartField string of the deposit. Expenses with a prior year accounting date are an exception. Contact Treasury Management if you have any questions on an expense refund.

Scenario: Your department bought 10 brand new computers and monitors, totaling \$10,000. The original voucher paid was #03120452. At the time of purchase a 15% rebate was promised to your department 3 months after the purchase. After three months, a check for \$1,500.00 has arrived and must be deposited.

Since this rebate check isn't revenue, the deposit is considered a cash expense refund and the funds deposited into the appropriate account.
