

Enterprise Reporting - Dimension Viewer

The dimension viewer shows a full tree view of the dimensions and measures in a cube. This view helps you understand the data structure and find the items you require. In the dimension viewer, you see an organized view of all dimensions, levels, and categories in a selected cube in a Windows folder-like presentation. You can drag items from the dimension viewer to add categories to rows and columns, perform filtering, and reorganize the dimension line on either a crosstab or a chart. You can also right-click the categories to perform actions on the data.

In the dimension viewer, the following actions can be accomplished using drag and drop or right-clicking:

1. change a row or column
2. change a measure or add new measures to your report
3. create a nested crosstab or chart
4. filter

If you prefer to use the full browser window for the display, you can close the dimension viewer by clicking the Hide/Show Dimension Viewer button .

Dimension Viewer Toolbar

1. If the dimension viewer toolbar is not visible, right click in a blank area of the dimension viewer and select "Show Toolbar"
2. You can use the dimension viewer toolbar buttons to complete the same tasks as when you drag items from the dimension viewer
3. If you use Netscape as your Web Browser, you must use the dimension viewer toolbar for tasks which also can be completed in Internet Explorer using drag-and-drop. When you use Netscape, the dimension viewer toolbar is enabled by default

For example to add a category as the nested top level in columns, click the Insert Before the Columns button  on the toolbar
