BLOCK ENROLLMENT

This instruction guide will cover the process for Block Enrollment of students. This process allows colleges and departments to identify cohorts of students with similar, or identical, course needs and enroll them in one process. The role required for this process is UF_SR_BLOCK_ENROLL.

There are 3 steps required to complete Block Enrollment; Create a Class Block, Create a Student Block, and Block Enroll Merge. In this Instruction Guide, we will cover how to Create a Class Block.

NAVIGATION

To access Block Enrollment, follow the steps below.

1. Log into myUFL using your GatorLink username and password.
2. Navigate to NavBar > Main Menu > Student Information System > Records and Enrollment > Enroll Students > Block Enrollment.

STEP 1: CREATE A CLASS BLOCK

The first step in the Block Enrollment process is to Create a Class Block.

1. From Block Enrollment, select Create Class Block.
2. Click the Add a New Value tab.
3. The Academic Institution should default to UFLOR.
4. Identify a 5-character alphanumeric code for your Class Enrollment Block.
5. Click Add to identify classes that should be added to the block.
6. Enter a Description for the block.
7. Enter Term.
8. Enter **Class Nbr**. You can also click the **magnifying glass** beside the Class Nbr field to search for classes.

9. Click “+” to add additional classes to the block.

10. Click **Save**.
**Note:** The bottom of the screen is reserved for overrides. These overrides will be based on security and will be the same overrides to which you have access in Quick Enroll. Overrides can be handled at this point or later in the Block Enroll Merge process. If they are used now, they will apply to all students in the block. If they are handled later, you will have to individually override each student’s errors as in the Quick Enroll a Student process.
